

Kentucky Sustainable  
Energy Alliance

**KySEA, an alliance of businesses, nonprofit organizations, faith communities and individuals, has come together to work towards a new energy future for Kentucky. KySEA promotes clean, sustainable and affordable energy solutions.**

## KySEA Member Groups

The following 54 groups have endorsed KySEA's mission and policy principles:

- |   |   |
|---|---|
| Alternative Energies Kentucky, LLC                              | Kentucky Conservation Committee                         |
| Appalachia-Science in the Public Interest                       | Kentucky Environmental Foundation                       |
| Avery and Sun   | Kentucky Habitat for Humanity                           |
| Bluegrass Greenworks, Inc.                                      | Kentucky Interfaith Power and Light                     |
| Center for Environmental Education and Sustainability           | Kentucky Solar Energy Company                           |
| Center for Sustainable Cities Design Studio                     | Kentucky Solar Energy Society                           |
| Clean Energy Action Project                                     | Kentucky Solar Partnership                              |
| Coalition for the Advancement of Regional Transportation (CART) | Kentucky Student Environmental Coalition                |
| Community Farm Alliance   | League of Women Voters of Kentucky                      |
| Cumberland Chapter, Sierra Club                                 | LexCoolCity.org   |
| Dovetail Solar and Wind   | Louisville Climate Action Network                       |
| EarthWorks, LLC   | Low Creek Farm  |
| Earthwell Energy Management, Inc.                               | Metropolitan Housing Coalition                          |
| Ecos Materials and Services, LLC                                | Mountain Association for Community Economic Development |
| Energy Systems Group  | Passionist Earth & Spirit Center Inc.                   |
| Federation of Appalachian Housing Enterprises, Inc.             | Phinix, LLC   |
| Frankfort Climate Action Network                                | Phoenix Comfort Systems, LLC                            |
| Frontier Housing  | RegenEn Solar   |
| Genesis Development of Kentucky, LLC                            | Shaker Landing Hydro Associates, Inc.                   |
| Global Environmental Services, LLC                              | Solar Energy Solutions                                  |
| Golfwood Services, Inc.   | The Green Building                                      |
| Home Energy Partners  | The Green Convene                                       |
| Homeless and Housing Coalition of Kentucky                      | The Housing Partnership, Inc.                           |
| Impact Energy, LLC  | The Malcolm Bryant Corporation                          |
| Inside Out Design, LLC  | University of Kentucky Greenthumb                       |
| Kentuckians For The Commonwealth                                | Wellhead Energy Systems                                 |
|   | Wind Energy Corporation                                 |
|   | Women in Transition                                     |

*This list was last updated July 2012. To join KySEA as an organization or an individual, contact [carrie@kysea.org](mailto:carrie@kysea.org).*

*The majority of Kentuckians think that developing renewable energy sources like solar is the best strategy for addressing the state's energy challenges.*

(Kentucky Environmental Education Council and U of K public poll, 2009)

## Clean energy policies will benefit all Kentuckians by...

- Curb energy costs for our families, farms and businesses
- Using our resources and know-how to put people to work and get our economy back on track
- Improving Kentuckians' health and well-being

We can do all of this without costing the state any tax revenue!

### KySEA Policy Principles

Make **energy efficiency** Kentucky's top energy priority.

Promote the production of **clean, renewable energy** and increase the share of our energy that comes from it.

Create **new jobs and opportunities** in the clean energy sector, including a just transition for coal-affected communities and workers.

**Enable all residents and businesses to take advantage** of these energy solutions.

### KySEA Policy Goals

**Pass sound state energy policies in the 2012 state legislature.** In 2012, Kentucky should pass legislation that establishes a renewable and efficiency portfolio standard and feed-in tariffs that boost in-state renewable energy production.

**Energy Efficiency** Offset 10.25% of statewide cumulative electricity use through new energy efficiency savings by 2022.

**Renewable Energy** Increase Kentucky's use of clean, renewable electricity sources to 12.5% in 2022.

**Kentuckians are ready for clean and stable energy sources. KySEA is working to make these energy possibilities a reality.**
